MODERN CLASSIC™

Industrial Strength Contemporary Style Aluminum Garage Doors

HÖRMANN NORTHWEST DOOR

Modern Classic Corrosion-Proof Construction

The Modern Classic is virtually maintenance free and built to last as long as you own your home! It is constructed using heavy duty commercial grade extruded aluminum stiles and rails. Framing members are mechanically fastened at joints creating an exceptionally high strength door frame. A precisely engineered Tongue and Groove (T&G) joint with a compressible gasket is incorporated at meeting rails. Single pane clear tempered glass is standard.

Options include (EPS) polystyrene insulation in the door frame as well as insulated glass. Calculated R-Values on various insulated glass types are shown below. Obscure and tinted glass as well as solid aluminum and expanded metal panels are also available.

The Modern Classic comes with a clear anodized finish. You may also choose from optional black, dark bronze anodized, wood grain and solid color powder coat finishes. Northwest Door offers a vast selection of designs including arched windows, sloped bottom sections, expanded, perforated and solid aluminum panels.

The full vision design of the Modern Classic makes it aesthetically pleasing and suitable for many exterior and interior applications including offices, restaurants and man caves. **It is the original full view garage door used in residential applications since 2007, with the heaviest and sturdiest construction in the industry.**

Note: Doors that exceed 18 ft. wide, 12 ft. high, 850 lbs., 192 total sq. ft., use full vertical lift hardware, or are used in a commercial application, are only available as Commercial 800 Series doors. Contact your Northwest Door Dealer for details.

Applications

Modern Classics on a beautiful man cave, an MC42-SC featuring a Black Anodized finish and Solar Cool Bronze Glass panels.

Outside

Inside

Modern Classics are used as an operational open air vision wall and as a counter door on this man cave.

Outside

Inside

Inside

Modern Classics are used as operational open air vision walls for the home and swimming pool making easy access to the kitchen and dining area.

Applications

Model MC52-SC used to separate a conference room from the reception area. It has a Black Anodized finish and Clear Tempered Glass panels. This door has been in use for over seven years and still looks brand new.

Model MC42-SC used on a boat house because of its corrosion resistance and durability. It has Clear Tempered Glass panels and a White Polycron III finish.

Model MC42-SC's used on the upper floors of this apartment building to enclose their social area and function as operational open air vision walls. They feature a Dark Bronze Anodized finish and Grey Tinted Glass panels.

Ahoy! Several Modern Classics were used on this custom house boat, some as operational open air vision walls.

Model MC32-SC with Pet Door in bottom section has Clear Anodized finish and Satin Etch Glass.

Applications

Model MC22-SC Dark Bronze Anodized with Clear Tempered Glass used as a walk up service counter at this seaside snack bar.

This wooden carport was transformed into a garage using a Model MC45-DC. It has Vertical Reed Polycarbonate vision panels and a Dark Fir Wood Grain finish. It is a perfect match to the natural wood structure.. *"I can't believe it's not wood!"*

MC42-SC and MC44-DC, Dark Bronze Anodized with Clear Tempered Glass in upper sections and Solid Aluminum Panels in the bottom sections.

MC43-SC's used as operational vision walls on restaurant with open air seating.

Panel Options

A selection of partial open air aluminum panels are available which allow for ventilation. They can be used in combination with solid aluminum or glass panels. Custom bottom sections can also be made to match the slope of your entryway. Please contact your Northwest Door Dealer for more information.

New Style Options

MC51-SC, Clear Anodized Frame,
Dark Fir Wood Grain Panels

Stand out from the lot with our new custom options available for the Modern Classic!

These stylish new looks can be achieved by using a combination of finishes. Use a solid color or anodized finish on the door frame and a wood grain finish on the aluminum panels, or vice versa. From our standard selection of finishes we have a total of 64 combinations to choose from.

You will be hard pressed to find another contemporary style garage door that is this unique and beautiful.

"More Garage Door Choices"

MC61-SC, Dark Bronze Anodized Frame,
Dark Walnut Wood Grain Panels

Garage Door Replacement, A Great Investment!

Model MC42-SC, Clear Anodized, Satin Etch Glass

According to **Remodeling Magazine's Cost vs. Value Annual Report**, year after year, a garage door replacement with upscale garage doors has continued to be one of the highest ROIs (*Return on Investment*) of all exterior remodeling projects.
